RESEARCH EXPERIENCE

Carnegie Mellon University, Center for Autonomous Vehicle Research
Graduate Student Researcher (Supervisor: Prof. Deva Ramanan) 08/2023 - Present
- Reconstruct dynamic 3D humans with loose clothing and handheld objects from a single video
- Sparse-view 3D scene reconstruction from aerial and ground imagery (with IARPA WRIVA)
- Explore pretrained diffusion models for pointmap prediction from image pairs
- Explore mesh-based radiance fields by revisiting classic differentiable renderers (e.g. SoftRas)

Carnegie Mellon University, Center for Autonomous Vehicle Research
Undergraduate Researcher (Supervisor: Prof. Deva Ramanan) 02/2022 - 05/2023
- Train real-time feed-forward shape, pose, and appearance predictors by distilling offline-optimized dynamic NeRFs
- Improve efficiency of 4D reconstruction from casual collections of monocular videos
